Harrison Twp., MI 48045

Satellite Dish Policy
March 1, 2007
(Replaces policy of August 1, 2005)

Meadow Lake Association, by law, cannot deny co-owners from installing satellite dishes. Our By-laws were written before satellite dishes were an option. Co-owners may install the dishes in lieu of using Comcast cable. Meadow Lake Board of Directors has established the following policy and recommended procedures:

1. If you wish to have a satellite dish installed, the co-owner must write a letter to the Meadow Lake Board. Please mail letters to 24678 Lake Meadow Drive.
2. The co-owner is responsible for the contact of the dish companies. All agreements for installation and payment of dish are a co-owner responsibility.
3. Location of the dish, on your unit, has to have Board member approval, before the final installation. There are certain locations of our buildings that the dish cannot be installed on. It is understood that the best position for installation is a southwest location. That location will vary, depending on which side of the street and what unit you live in. There will be no installations on any rooftops or grounds.
4. If a dish is installed without location approval from the Board, the co-owner will be required to remove the dish, at co-owner expense.
